RE: SFR/AAAASFI Inspector Training Workshop – Geneva, Switzerland
Tuesday, September 04, 2012
9:00 a.m. to 12:00 p.m.
Intercontinental Hotel
Geneva, Switzerland

As you are aware, our Association depends on physicians from within our accredited facilities to conduct facility inspections. This is one of the ways our Association maintains lower accreditation fees, while maintaining our high patient safety standards.

All physicians that have completed the SFR/AAAASFI inspector training are asked to be available as facility inspectors. Therefore, it is extremely important that each physician from an accredited facility attend a training workshop once every three years for Inspector Certification. There is a \$500 honorarium paid for each inspection and also travel expenses acquire during each inspection.

In an effort to meet the increasing demand for certified inspectors within the SFR/AAAASFI accreditation program and to comply with the regulatory requirements in some countries, a training workshop is scheduled and will be held at the ISAPS 21st Biennial Congress in Geneva, Switzerland at the Intercontinental Hotel on Tuesday, September 04, 2012.

We strongly urge you to attend the training workshop and encourage other physicians at your facility to do the same. Your attendance will ensure that our Association maintains an adequate number of trained inspectors to perform on site inspections of our accredited facilities.

We look forward to seeing you in Geneva, Switzerland in September, 2012!
